DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-14 and 16-17, drawn to a method for treating a LFA-1-mediated disorder in a mammal comprising administering an initial dosing of an anti-ICAM-1 antibody, classified in Class 424, subclass 152.1 and 172.1.
- II. Claims 1-18 and 20, drawn to a method for treating a LFA-1-mediated disorder in a mammal comprising administering an initial dosing of an anti-CD18 antibody, classified in Class 424, subclass 152.1 and 172.1.
- III. Claims 1-20, drawn to a method for treating a LFA-1-mediated disorder in a mammal comprising administering an initial dosing of an anti-CD11a antibody, classified in Class 424, subclass 152.1 and 172.1.

2. Groups I-III are different methods. A method of detecting and a method of treating differ with respect to ingredients, method steps, and endpoints; therefore, each method is patentably distinct.

3. These inventions are distinct for the reasons given above. Even though the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Therefore restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maher Haddad whose telephone number is (703) 306-3472.
